LEONID BELIKOV

Senior Frontend Engineer | UI Performance & Browser Media Processing

Email: belikov.webdev@gmail.com **LinkedIn**: linkedin.com/in/belikov-frontend

Location: Belgrade, Serbia (Open to Remote / Hybrid) **Total Experience:** 8 Years

PROFESSIONAL SUMMARY

Senior frontend engineer with 8 years of professional experience specializing in browser-based media processing and high-performance web applications with multi-threaded architecture and handling massive data.
Proven track record of building sophisticated UI tools from scratch and leading technical initiatives in a team environment.

CORE SKILLS

Languages:	JavaScript, TypeScript
Frameworks & Libs:	React, React Query, Radux UI, Zustand, Redux
Performance & Media:	WebCodecs API, Web Workers, Web Audio API, OPFS

WORK HISTORY

Senior Frontend Engineer, Instories (Software Development)

August 2023 - August 2026

- Architected and developed from scratch a heavy client-side web application incorporating 4 complex content creation tools, centered around an advanced web-based video editor.
- Designed and engineered a high-performance media pipeline leveraging the modern WebCodecs API, multi-threading (Web Workers), sharing data between threads that allows to make video decoding and process frames with 60 FPS without main thread freezes.
- Created a highly interactive UI supporting object manipulations, using coordinate transformations (moving, scaling, rotation) in real time.
- Implemented a custom corporate UI-kit with 20+ accessible components based on Radix UI.

Frontend developer, Mobile Media Group (Advertising Services)

March 2020 - August 2023

- Developed a dynamic freelance marketplace using React and TypeScript, driving adoption to over 2,000 active users within the first month of launch.
- Mentored 2 frontend developers, introducing structured code reviews.
- Executed a deep refactoring of core application views, reducing overall code volume by 10% while significantly improving maintainability and render times.

Frontend developer, Company Tensor (IT Services and IT Consulting)

October 2018 - March 2020

- Created web pages according to design layout using HTML, CSS, JavaScript and reactive MVVM-framework within a team of 40+ developers.
- Successfully diagnosed and resolved over 80 bugs.
